Beeline

OPEN SOURCE NEW TAB

Fast, visual bookmark dashboard for Chrome, Brave and Firefox

Chrome | Brave | Firefox

Transform empty tabs into an organized command deck.

A clean, responsive dashboard designed to bring visual order to complex workflows and daily resources.

100% FREE

FREE AND OPEN SOURCE

- **Free forever:** No price, no trial, no premium tier, no in-app purchases, no ads.
- **Open source (MIT):** Anyone can read, check and reuse the code on GitHub.
- **Complete local privacy:** No account, no sign-up, no server, no analytics, no tracking.
- **Your data stays on your computer.**

Why Beeline

Simple by default

Only the basics in view; one click switches to Advanced.

Nothing is lost when switching back and forth.

Organised your way

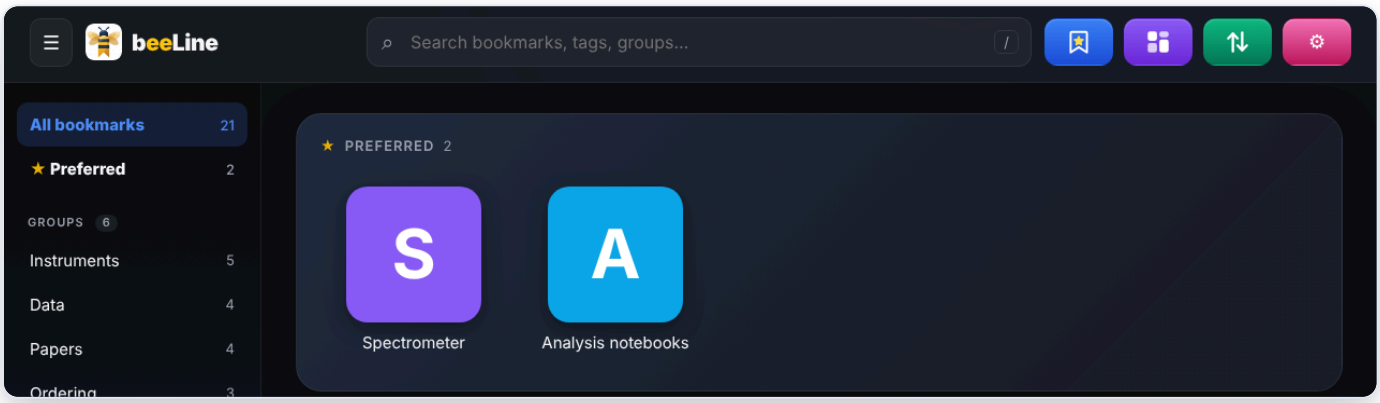

Groups, 2 to 5 tabs, and flexible visual categorization.

Preferred row with adjustable size to suit your display.

Private by design

Everything stays strictly on your computer.

No account, no server, and no telemetry or tracking.

Simple by default: clean dashboard with quick access to key bookmarks and groups

Designed for bookmark-heavy workflows

Beeline replaces the empty new-tab page with a fast, visual bookmark dashboard. It is crafted for anyone managing dozens of active links, and especially built for people running labs, home labs, local servers, or extensive web tooling.

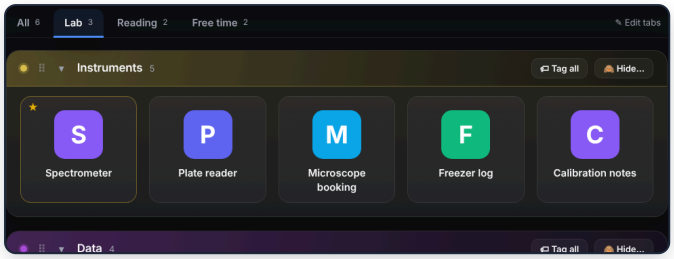

TRANSPARENT DEVELOPMENT

Built with AI assistance: the author set the goals, made product decisions and tested; an AI wrote much of the code.

Key functions

100% FREE MIT Licence · No Ads · No Tracking

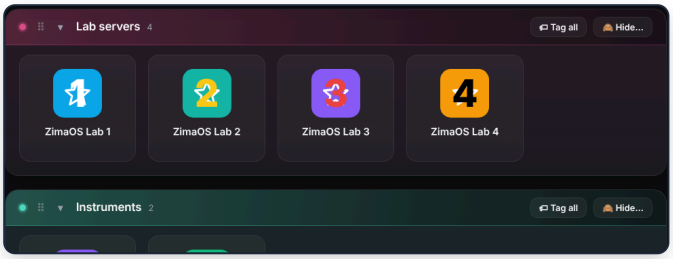

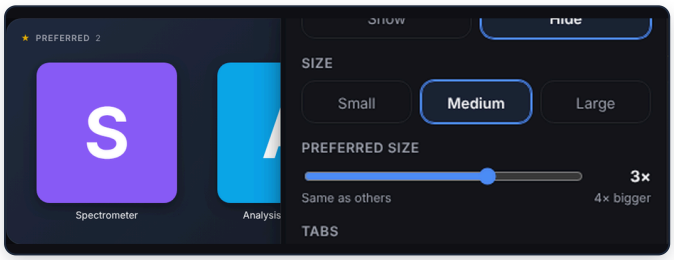

01 Tabs for your groups

Split groups into 2 to 5 tabs (e.g. Work, Free time, Lab). A group can be in several tabs. Drag onto a tab to copy, or right-click drag to move.

02 Label on the icon

Add one character (1, 2, 3, A, B...) in white, black, yellow or red to tell apart bookmarks sharing one icon. Great for lab & home-lab dashboards.

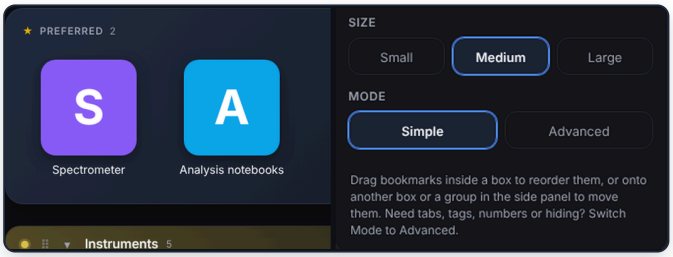

03 Preferred row with adjustable size

Your most-used sites as big buttons at the top, in a size you choose from the same as other bookmarks up to 4 times bigger.

04 Simple by default, powerful when you want it

Simple mode shows only the basics; one click switches to Advanced, and nothing is lost when you switch back and forth.

05 Instant search Real-time filtering across titles, addresses, tags and groups directly from the search bar with keyboard shortcut support.

ALSO INCLUDED IN BEELINE

- Drag and drop (mouse and touch)
- Colours and emoji for groups
- Tiles / list / compact icons in three sizes
- Dark and light themes
- Import your browser bookmarks
- Backup and restore
- Optional Chrome & Brave sync via one file
- Your own icons

How to get it

See INSTALL guide in repo

1. Download from GitHub (store versions coming soon).
2. Load in your browser via Developer Mode / Extensions.
3. Open a new tab and start organizing your links.

HONEST STATUS (BETA V2.6.2)

Used daily in Chrome and Brave; Firefox build works with less testing and no automatic sync. Desktop browsers only (Windows, macOS, Linux); no phone app.
